HOW DOES IT HELP?

Scalability

GLC offers a range of services and instant access to individuals with the talent and skill-sets that can be leveraged at any time to support the changing accounting and bookkeeping needs of growing companies.

Low-margin, High Input

Handing over low margin compliance work helps clients focus on the higher-profit, more interesting work such as business advice.

Cost-effective

Outsourcing accounting and payroll functions cost roughly half of what it does when processed in-house.

Ensure Business Continuity

Most small businesses lack the time and resources to develop business continuity plans. Working with a reliable outsourcing company mitigates the risks associated with losing internal staff, as the function and associated business knowledge are not reliant on a single employee.

Growth Without Overheads

Our services allow firms to take on more clients without moving into larger facilities, adding computers and staff, plus firms can avoid hidden costs that come in the form of taxes, holidays, sickness and benefits
